MISSION: DISCOVER NFT PLANETS

Have you been dreaming of exploring the secrets of the universe? That's not an easy task if your last name isn't Armstrong, Bezos or Musk. Thankfully, you don't need billions in the bank to discover unique planetary NFTs. With the help of your Cardano wallet and a little bit of ADA, you can launch your expedition of the galaxy.

HOW TO EARN PLANETARY NFTS

Every expedition is guaranteed to return from space with a newly minted planetary NFT. Here's how to send missions out into the galaxy:

Select the class of planet you want to discover,

Fuel your expedition by sending ADA to the payment address we provide,

Receive your unique planetary NFT back to your Cardano Wallet

If you need a Cardano wallet, the following are some great options:

DAEDALUS

YOROI
wallet

NAMI WALLET

DAEDALUS

THE FIRST GALAXY COLLECTION

The first collection from Space Tokens explores our home galaxy where there are a total of 25,000 planets to be discovered. Keep track of your discoveries from the My Expeditions page and show off each of your planets by sharing your discovery permalinks all over the internet. These planets are stored on the Cardano blockchain forever.

PLANETARY TYPES

There are 26 different planet types to be discovered, all with unique characteristics and randomized imagery. We spent a lot of time ensuring that every planetary image generated is unique from every other one.

Class 1 - 10000 "Common" planets available

Rocky

Minimal

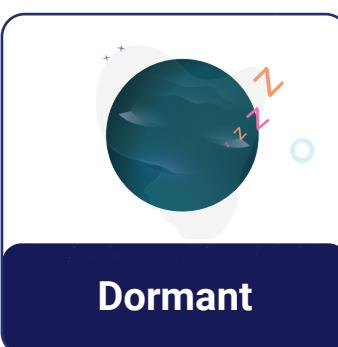

Ice

Crater
